
change folder that contains images for slidernu?

Posted by scharfet - 2010/11/24 11:01

Hello,

I'd like to change the source folder for the images for the slider-menu.

Now ist is in /modules/mod_arislider/includes/js/img/slides/. I'd like to change ist to /images/stories/arislider/, so a backenduser can upload the icons without using ftp.

Is it possible to do it?

It is correct to change these two files?:

/mod_arislider/mod_arislider.xml and

/mod_arislider/templ/menu.php

I like the Slider-Module!

Regards

Hannes

Hello,

Yes, it will be enough to change path to icons in module manifest file (mod_arislider.xml) and in menu template file (menu.php). If you have any difficulties with it, we can update necessary files and provide it for yuo.

Regards,

ARI Soft

Hello,

Everything is klear now. Thank you for your offer to change the files, but I can do it by my self.

Regards,

Hannes
