Larger thumbnail images

Posted by mmcl - 2010/01/19 17:43

_____

This looks like a great module, but would need a few tweaks to do what I am looking for:

Allow larger thumbnails (192x133+) with rollover images
Background image in article area to allow for "seamless" scrolling of articles with no white space or border between them.

Here is a screenshot of what I mean:
 http://www.ari-soft.com/images/fbfiles/images/demo-7f09b26832129793a12191d8045a0175.jpg
Demo of my current problematic "slider" module in action (IE8 probs).

Please let me know if these are changes you might soon implement.
I would be happy to "field test" any updates and would be the first to purchase the module.

Thanks for your time and keep up the great work!
Mike.
