
Dark Theme

Posted by ori - 2013/02/21 20:27

Hello, is there any possibility to have the ARI Slider in a dark theme? I am not a coder neither a website expert.

Hello,

It requires to modify slider styles and images.

Regards,
ARI Soft

That would mean editing which files exactly?

See images in \modules\mod_arislider\includes\js\img folder and \modules\mod_arislider\includes\js\slider.css CSS file.

Regards,
ARI Soft

I put it on our site <http://racingteams.co/> and it works fine so far but the article background would need to be dark or transparent. I looked at the images and the css file but couldn't find anything. Can you help?

I marked the area with red on the screenshot.

Add the following CSS rule:

```
.ari_slider_items
{
background-color: blue;
}
```

Regards,
ARI Soft
