## ari sexy image any where

Posted by chakkaramole - 2011/01/21 02:51

---

Mostly i host my thumb nail and images in imageshack. I want a code when user click on the thumbnail then open a enlarged separate image and some times i want to keep the same size also. What code to be used??

Also some is it possible to specify the second image width by code?

I want to use the following article in sexylightbox anywhere!

<http://mooshikan.org/malayalam-movie-gossips-malayalam-movie-news-malayalam-cinema-news/6115-malayalam-movies-going-backwards>

as you see the image is pretty long i would like to keep the same size to ensure the readability!!

Thanks

Could you specify in what way you use the extension (use "ARI Sexy Lightbox" module, "System - ARI Sexy Lightbox Anywhere" or "System - ARI Sexy Lightbox" plugin)?

"Keep size" feature is available for "Image Gallery" and "Picasa" source types.
