PNG images & sexy lightbox

Posted by soedesh - 2011/01/29 10:55

_____

Hi,

I have installed sexy lightbox in combination with the cloud carousel. Works fine, but because iÐ±m using png images, the lightbox looks weird. Is is possible to make the background just white? Here is the link: http://www.shushu.nl/new-arrivals.html press on the accordionbutton on new arrival shoes.

Thanks in advance.

_____

Hmmmm, I think I solved the problem by changing the overlay color into white. FIXED!!

_____

We have updated "ARI Cloud Carousel" and "ARI Sexy Lightbox" modules. New version of "ARI Cloud Carousel" provides ability to define background color of sexy lightbox. Download and upgrade "ARI Cloud Carousel" and "ARI Sexy Lightbox" module that use this ability.

_____

Thanks, it works fine now ;)

Another question, it's not the right topic, but I read the topic about captions in lightbox, but don't really understand how to put them in the lightbox. What I want, is to put the Brand-articlenr-color-price in the lightbox. Can you please advice me.

Thanks in advance.

Regards,
Soedesh

_____

Could you provide more details about caption, do you want to use it with "ARI Cloud Carousel" and display different caption in carousel and lightbox? Or you want to lightbox separately, where "Brand-articlenr-color-price" information is stored?

_____

Do you want to use this feature only with "ARI Sexy Lightbox" or together with "ARI Cloud Carousel"? It is possible if you use "ARI Sexy Lightbox" separately.

Re:PNG images & sexy lightbox
Posted by soedesh - 2011/01/31 15:04
_____

Together with ARI Cloud Carousel

===

Re:PNG images & sexy lightbox

_____

It can be done only if no need to display titles into cloud carousel. In this case "Brand-articlenr-color-price" information can be placed as titles in cloud carousel description file.

_____

Enter "Brand-articlenr-color-price" information in "" section in cloud carousel INI file with descriptions and add the following code to "CSS Styles" parameter in "ARI Cloud Carousel" module settings:

DIV{$id}_wrapper DIV.ari-cloud-carousel-alt
{
  display: none !important;
}

_____

Hi,

To start, I put all the images in map called /images/stories/shoesari I have numbered all the images like shoe1, shoe2 etc....... Can you give an example how to put the info in this field. For example shoe1 is brand: Progetto art P234, Color Black and Price Ð,119,95 Do I have to make this in notepad and then put th file in the description field or something else. Like I told you before;IÐ±m just a starter :S

Re:PNG images & sexy lightbox
Posted by admin - 2011/01/31 20:47

_____

Place aricloudcarousel.ini file with the following content into image folder:

shoe1.png="Progetto art P234, Color Black and Price Ð,119,95"
shoe2.png="Progetto art P234, Color Black and Price Ð,119,95"

PS: You can provide temporary access to your Joomla! backend by email and we will configure extension for you.
