
Open article in lightbox

Posted by soedesh - 2011/01/29 20:21

Hello,

Could someone tell me if it's possible to open the articles on this page <http://www.shushu.nl/blog.html> with the sexy lightbox. I read about it in the details but I'am not that experienced. So if possible can you explain me in a simple way, even it's not simple :unsure:

Hello,

It is possible to do with help "ARI Sexy Links" plugin "ARI Sexy Lightbox" package. Enter the following code into "Elements CSS selectors" parameter on plugin settings:

"div.lof-main-item a"|width=500&height=350&tmpl=component

Regards,
ARI Soft

Hi,

I want to open tumbs from a module with sexylightbox. Do I have to put the same code in de css selector and change the module name?

Regards,
Soedesh

Hello,

Could you explain your needs in more details? Do you want to show thumbnail and if a user clicks by this thumbnail, original image are shown in the lightbox?

Regards,
ARI Soft

You can use "System - ARI Sexy Lightbox" plugin, code looks like:

Where LINK_TO_IMAGE is link to original image, LINK_TO_THUMBNAIL is link to thumbnaill.

Do I have to put this code in an ini file, and use for each image a code?

=====

Re:Open article in lightbox

Place this code in module content. In your case if image gallery is generated automatically by the module, "ARI Sexy Links" can be used, but generated content by the module doesn't contain links to original images. You can see it if open HTML source of the page.

Regards,
ARI Soft

Ok thanks,

I will experiment with it.

Kinf regards,
Soedesh
