
Menu Item LightBox Link

Posted by getmethere - 2011/02/27 10:37

Hi,
I love the Lightbox. Just one question.

I want to create a link to an external web address from a menu item and have it show in the lightbox. Like your link in your demo to Google?

OR Create a link to external web address using an image to click on and opens in the Lightbox, not just a word link.

Can it be done?

Many Thanks

Glenn

Hello,

Yes, it is possible to assign menu item(s) with sexy lightbox with help "System - ARI Sexy Links" plugin which is included into "ARI Sexy Lightbox" package. If you provide link to page with menu and say what menu item(s) do you want to link with sexy lightbox, we will help to configure the plugin or you can configure it by yourself, but it requires a little CSS knowledge.

If necessary to show lightbox if a user click by an image the following code can be used:

```
{arisexylightbox activeType="rcontent" width="300" height="250" url="http://www.google.com" title="Google"}{/arisexylightbox}
```

Where LINK_TO_IMAGE is link to necessary image.

Regards,
ARI Soft

Hi,

Thanks for the prompt reply. I have the Image lightbox link ok.

I will need a little help with the menu item.

Bacically , I would like it to link to an external URL on the top menu.

Please let me know what you need and PM me - I will supply access.

Thank you.
Glenn

I have the same problem. I want to create an menu item in top menu and I want this will be open with lightbox instead of in a new window (target= blank) I have publish ari sexy Link but I can not find the way to do it.

Today you have help me resolve another problem but I don't like disturb you for every thing. If you can explain I will be glad.

Thank you very much.

Manuel DĐ^{1/2}az.

When I publish ari sexy Links there is library conflicts with another module position in topblock.

Posted by admin - 2011/03/01 15:43

"ARI Sexy Links" plugin requires a little knowledge of CSS selectors. If you don't have it, it is not a problem. You can provide link to page with menu and say what menu item do you want to assign with the lightbox and we will be glad to help configure the plugin.

Regards,
ARI Soft

Hi,
Thank you for sorting out the link for me - works like a dream.

regards
Glenn

To cfpmadrid,

We have configured the plugin and now menu links are shown into the lightbox but it causes problem with "LOF Cordion" module. This module can't work if several jQuery instance are loaded. If add the following code into site template after tag and disable jQuery loading in other extensions like "LOF Cordion" and "ARI Sexy Lightbox" or contact "LOF" developers that they update their extension:

jQuery.noConflict();

I have the same issue trying to setup a single menu item in my top menu to open our blog in a lightbox
Trying to get my head around selectors but not having much luck

Admin I can see you are online.....how do i send you a pm?

omg so sorry....dont know how that happened!!
Although I was still pretty off with my css selector by the looks of it as well!

Thanks so much for doing this so quickly I cant thank you enough!
ARI Soft are brilliant!

I would also like a menu item that is an external link to show in lightbox. The website is www.lams.info/site2011. The calendar of events link (top left) is the one I want to show in lightbox. I do have it working in a text link at the bottom of the page. thanks

Re:Menu Item LightBox Link

Posted by admin - 2011/04/20 14:58

This is a problem to show links from left menu in lightbox because menu module navigates to menu links with help javascript. This approach can also cause problem with search engines because they don't see these links.

I'm confused. in a previous post you said it could be done with a top menu item using ARI sexy links. is this a problem because of left position?

=====

Re:Menu Item LightBox Link

Posted by admin - 2011/04/20 16:09

It is not a problem with menu position, this is the problem with your menu module. It is not a problem to attach the lightbox menu item if a menu module uses normal HTML layout (for example `<a href="">` tag with "href" which contains link), but your module doesn't contain link in HTML elements, it navigates to links with help javascript.

Re:Menu Item LightBox Link

Posted by admin - 2011/04/20 17:13

It can be used with javascript menu, but when it uses standard HTML layout. If you can't change your menu module, contact us by email please that we can discuss your question about refund.

Regards,
ARI Soft

I am interested in setting up a menu item to link to my Sexy Lightbox how would this be executed ?

What do I have to specify in my plugin details ?

Re:Menu Item LightBox Link

Posted by admin - 2011/07/24 17:54

It can be done with help "ARI Sexy Links" plugin. We can help to configure the plugin, if you provide your order number by email and link to page where we can see menu item which you want to associate with the lightbox.

Regards,
ARI Soft
