## COMBINE CODE WITH IFRAME

Posted by chali84 - 2011/03/02 22:47

---

HELLO THERE  
CAN YOU HELP ME PLEASE !!!

I AM USING SEXY LIGHT BOX FOR DISPLAY VIMEO MOVIES  
BUT VIMEO GIVE ME A IFRAME CODE FOR TO BE IPAD COMPATIBLE

WICH IS THE RIGHT CODE FOR USE THE IFRAME FROM VIMEO AND SEXYLIGHT BOX CODE INTO A JOOMLA ARTICLE?

THIS IS IFRAME TEST FROM VIMEO:

this is my code without iframe:

```
{arisexylightbox activeType="rcontent" width="640" height="360" url="http://vimeo.com/20563464?title=TEST&"}
```

```
{/arisexylightbox}
```

please help me !!

Hello,

The next code converts vimeo link into iframe which will look like code provided by Vimeo:

```
{arisexylightbox activeType="rcontent" width="640" height="360" url="vimeo.com/20563464?title=TEST&"}
```

```
{/arisexylightbox}
```

Regards,  
ARI Soft

---

thks for the code  
but what i really need is combine the iframe from vimeo (because this iframe makes ipad and iphone compatible the videos) with my sexylightbox plugin  
this is the iframe from vimeo:

how can i combine this iframe with arisexylightbox???

i know that the code without iframe i have send before works.. but for ipad compatibility i need use the iframe above

thks for your help

Provided code generates the same code for . Do you have any problems with "{arisexylightbox}" code?
