Updated j! 1.6.0 to 1.6.1:sexylightbox not working
Posted by coquin - 2011/03/09 10:07

_____

hallo
Today I updated Joomla 1.6.0 to 1.6.1 and now arisexylightbox doesn't work anymore: when clicking the link, the linked article opens in a full page.
last month you made an intervention in my site (there still is the user account I created for you), maybe in joomla core, I don't know.

Can you please find a solution?
If necessary I'll enable your account again.

Thanks
ruggero

_____

Hello,

Enable account again please and provide link to page where we can see the problem.

Regards,
ARI Soft
