
Sexy Lightbox conflicts with Mega Menu?

Posted by rmesa4748 - 2011/03/27 02:00

Hello,

I just installed Sexy Lightbox. Cool extension but I believe it conflicts with Mega Menu extension.

NOTE: Mega Menu was working prior to Sexy Lightbox Installation. After Sexy Lightbox installation, Mega Menu disappears. Me sad now.... :(

I am using Joomla v.1.6

I installed plg_system_ariextensions as noted in Ari readme file.

Can someone confirm if Sexy Lightbox has a compatibility issue with Mega Menu?

Thanks in advance,
Robert

Hello,

Could you provide link to page where we can see the problem?

Regards,
ARI Soft

There's nothing to see.... the menu is gone????

Look to the top of the screen to the right of the logo. NO MENU. Plus page hangs, looking for elements to display.

This problem occurs because the menu can't work when several instance of jQuery library is used. Your site template loads jQuery library so you can disable loading jQuery library in "ARI Sexy Lightbox" module and sexy lightbox plugins with help "Include jQuery" parameter (set it to "No"). It should resolve the problem.

Regards,

ARI Soft

Thank you for your help. I can confirm setting "include jQuery" to NO within ARI Sexy Lightbox modules and plugins resolves issue.

ISSUE: RESOLVED :cheer:

Thanks again,
Robert
