Fatal error: Class \'AriJSONHelper\' not found in...

Posted by cfpmadrid - 2011/04/18 11:40

_____

Hello:

I am not able to undestand what happend. I discribe what I did:

I have the same site over two diferents domains. the first one is online and the second one it is a security backup.

In the first site everything is working right and I download it ftp way (as root) from the first site to upload the second one (as user) and itÒ's appear this message...:

Fatal error: Class 'AriJSONHelper' not found in /var/www/vhosts/cursos-online-fotografia.com/httpdocs/modules/mod_arisexylightbox/includes/kernel/SexyLightbox/class.SexyLightbox.php on line 57

(this site is online right now if you need to see.)

I have to said that i tried too download it as user and upload as user.

Can please help me.

I hope I explain propertly

Thanks a lot

_____

Hello,

Read this post please. It seems you have the similar issue.

Regards,
ARI Soft
