## Ninjaboard

Posted by fairwea1 - 2011/05/30 18:55

---

Hi,

I'm trying to get sexy lightbox to open up my ninjaboard attachments. I've tried a couple other modal system plugins and they worked. Is this possible using the sexy lightbox? Currently my images are opening in a new window.

Here's a thread from the ninjaboard forum that explains how it works.

Is this possible to use for ninjaboard?

Thanks,  
Eric

Hello,

We suppose it is possible with help "System - ARI Sexy Links" plugin from "ARI Sexy Lightbox" package. If you provide link to page where we can see link(s) which you want to ingrate with "ARI Sexy Lightbox", we will help to configure the plugin.

Hi,

Thanks for looking into this.

My Site

Thanks,  
Eric

Install "ARI Sexy Lightbox" module then install, configure and enable "System - ARI Sexy Links" plugin and enter the next code in "Elements CSS selectors" parameter:

"A.modalizer\_link"|width=400&height=400

I tried that and it didn't seem to help.

Does the module need to be enabled to get the plugin to work? If so, the module gave me a conflict with ninjaboard.

Nevermind, it's working doing just like you said.

Thanks!

It doesn't work because HTML code of links was changed. Currently use the next code:

"A"|width=400&height=400
