
Gallery parameters

Posted by alexmartin - 2011/06/01 20:02

In this gallery images spread evenly over the page. I need them 1) to be 5 px close to each other, left justified
2) Not gray, and
3) with gray border. What parameters should change and use?

Here is my code:

```
{arisexylightbox activeType="imglist" grayscale="true" type="gallery" itemCount="6" dir="user/demo/gallery"
thumbWidth="100" thumbHeight="100"}{/arisexylightbox}
```

Hello,

Could you provide link to page where we can see the gallery and screenshot where we can see what you want to achieve?

Regards,
ARI Soft

See how the images spread evenly on the page. That is not what i need. I want images closer to each other on the left.

http

Thank you

Add the next CSS rule to site template CSS file:

```
TABLE.asexy-table
{
width: auto;
}
```
