
Link text size in plugin param

Posted by alexmartin - 2011/06/05 05:45

How to change default Light Box links to size 12? I want to change the default settings how the link looks on the page, if tot inside of the plugin file code than directly in the plugin tag parameters: The link is: Read More:

```
{arisexylightbox activeType="icontent" bgColor="#FFF" width="500" height="500" link="Read More" title="title"}content content {/arisexylightbox}
```

Hello,

Add the next CSS rule to site template CSS file:

```
A.sexy-link
{
font-size: 12px;
}
```

Regards,
ARI Soft

It does not help.
Here is the page:

<http://6fiu.com/testingpopup>
Thank you.

Sorry, but provided CSS rule works fine. Currently "Want to know more? Click me" has font-size equals to 12px. If you want to increase it, change "12px" value in previous CSS rule to appropriate value, for example to "16px" or "20px".

Regards,
ARI Soft
