
show lightbox on hover

Posted by wicky - 2011/06/11 19:31

I want to place an image on my site and when the visitor hovers over it the lightbox appears. is this possible with ari sexy lightbox?
if so can you give me some direction how to do it?

=====

Hello,

The extension doesn't work in this way, but you can install and enable "System - ARI Sexy Lightbox" plugin and use the next HTML code:

Where LINK_TO_IMAGE is link to image which will be used as link to external page.

Regards,
ARI Soft
