
How to stop all effects on lightbox

Posted by raidnet - 2011/06/12 17:52

Hi,
I wish using sexylightbox with picasa album, with no move effects, I wish only opening the lightbox and start the sliding, with no image move, no image walking etc.
I have set all move parameter to 0 but the images go around the screen doing random effects with no control.
Any tips?
thanks
luc

Hello,

Set "Resize duration", "Move duration" and "Shake duration" parameters to 1.

Regards,
ARI Soft
