
Exit-Lightbox

Posted by SKramer - 2011/06/13 09:11

Hello,

iO've buy "ARI Sexy Lightbox" and will use it as Exit-Lightbox.

Follow Questions:

- How i can show the Lightbox directly on leaving Page, without the Windows PopUp "will Leave the Page?". On Startup it shows direct, without System-Message, possible on Leaving Page too?

- It should not show by visit internal Pages, only User leave (or close) the Site to another Site (like Google).

Thankfull to get Help

Sorry for the Bad English ;-)

Hello,

1. No it is impossible. This is not the extension limitation, this is limitation of browsers implementation of "onbeforeunload" event.

2. The lightbox is shown in any case when a user try to leave a page.

Regards,
ARI Soft
