
ari sexy thumbnails

Posted by Partizan - 2011/06/14 09:54

I've changed settings again and again, but not work

Hello,

Sorry, but what doesn't work? Provide more details about your problem.

Regards,
ARI Soft

I have before I used the `plg_content_mavikthumbnails` and work correctly.

But the ari sexy thumbnails open image in the new page with no popup , i think problem in script.

Possible to admin user name and pass give you and you test it

Could you provide link to page where we can see the problem and temporary access to your Joomla! backend by email that we can investigate the problem?

Regards,
ARI Soft

But I always activate "CoreJoomla - jQuery Plugin" and version 1.5.1 on my site has been loaded always!
now both versions are loaded,
In the future you update to version 1.5.1 ,

Hopefully add the ability to delay the opening and closing automatic when page load in the "ari sexy lightbox anywhere"

"ARI Sexy Lightbox" can work with jQuery v. 1.5.1 without problems. "Core Joomla! - jQuery Plugin" loads jQuery library
after "ARI Sexy Lightbox" assets loading so it didn't work.

Regards,
ARI Soft
