
LightBox behing Allvideo plugin

Posted by alexmartin - 2011/06/15 01:09

Lightbox show up behind the video. Please advise how to make the lightbox above the video player.

Hello,

The lightbox appears below video because and tags for video don't contain wmode="transparent" parameter.

Regards,
ARI Soft

I will be glad to add the tags if i know where to add it. Could you be kind to help me to identify where to add the tags and ?
Please.

Tags are generated by AllVideos plugin. Set "Player transparency for Flash based media" parameter to "Yes" in AllVideos plugin settings. If it doesn't help we can recommend to contact plugin's developer that they provide solution how to set wmode="transparent" attribute for video generated by their plugin.

Regards,
ARI Soft
