
Any wayto merge advanced gallery and sigle images

Posted by raidnet - 2011/06/15 11:59

I like the advanced layout gallery mode, I show 3 or 4 thumbs in my page, but my users wish see in the lightbox all the gallery images (about 20 in picasa folder).

If I choose single image mode, I show all the gallery but I have only one thumb in my page.

Any way to shows 3 thumbs on the page and all the images in the lightbox gallery?

thanks

"Advanced gallery" doesn't provide this ability. It can show only all images. You can specify how many images should be shown in "Simple gallery" mode with help "Visible items count" parameter.
