
H1 headline in article lightbox, tags

Posted by RobertFS - 2011/06/23 04:56

Hello,
thanks for contributing sexy lightbox. I use this for display of Joomla articles same site using: {arisexylightbox
activeType="article" width="300" height="250" id="229" link="Readmore" title="Article"}{/arisexylightbox}"

1. I can't delete the ending " in the article, happens in JCE + TinyMCE Editors only appears after inserting
{arisexylightbox etc. }

2. In lightbox a big H1 headline appears "Articles" I have no idea where this comes from

3. At the bottom of lightbox article a next link appears which I can't control+don't need

see:

kreuzfeuer-berlin.de/index.php#s5_top_row2_area1

this is:

Joomla 1.6, shape5 template,

thanks for answers

best Robert

Hello,

1. This problem with Joomla! filters. Find solution how to fix this here.

2. This is Joomla! "feature". Information how to remove the message can be found on official Joomla! forum.

3. Open "Article Options" tab on article edit page and set "Show Navigation" parameter to "Hide".

Regards,

ARI Soft

Thank you cool stuff still got this big head H1 Headline "Article" but am confident to get rid of that as well.

Cheers

Robert
