
Autoplay Video?

Posted by PrinceOle - 2011/07/13 13:20

Hello there,

I'm using The Sexy Lightbox Version 1.8.12 with Joomla 1.5.

I integrated a video (.flv) using the "remote content" option and I'm wondering if there is the any possibility to autoplay the video in the lightbox.

The Video should be an "intro" for the Website and therefore it would be nice to autoplay without the need to click on "play".

Thank you very much for your support.

Hello,

Set "Auto play videos" parameter to "Yes" in module or plugin settings.

Regards,
ARI Soft

Thank you very much... and sorry for the stupid question. I simply haven't seen it after looking hundred times in the configuration.

Thanks again.
