ARISOFT Sexy Lightbox with SlideRocket

Posted by gameinvest - 2011/07/14 16:55

_____

Hi,

I'm trying to set up sexy lightbox to pop up a SlideRocket presentation.
It's very weird because sometimes the presentation shows up fine, and most of times it returns an error saying "presentation not found". :huh:
I think it as something to do with the parameters that lightbox adds to the url..

Website url: http://www.gameinvest.net/index.php?option=com_content&view=article&id=91&Itemid=100 (Black button bellow - corporate presentation)

SlideRocket presentation url: http://app.sliderocket.com:80/app/fullplayer.aspx?id=12e51548-09c6-4586-ab7e-e32f372f523d

Code that i'm using in my article:
{arisexylightbox activeType="rcontent" width="640" height="480" url="http://app.sliderocket.com:80/app/fullplayer.aspx?id=12e51548-09c6-4586-ab7e-e32f372f523d" title="Corporate Presentation"}{/arisexylightbox}

Thanks in advance!

Regards,
AP

_____

Hello,

Provide presentation requests some information, it can cause the problem:

_____

Hi,

I've tried without form requisite. Also tried with other presentations and the result is always the same: presentation not found.

Please check attached file.

_____

The lightbox loads presentation in and we suppose presentation security settings doesn't support ability to show it into because another presentation from your letter works fine. You can see it here.
