
help

Posted by stewstew - 2011/07/23 06:33

what am i missing?

i am trying to create a thumbnail that pops up to the lightbox.

my syntax is:

```
{arisexylightbox thumbWidth="250" thumbCount="2"}content1content2content3{/arisexylightbox}
```

Hello,

Could you specify what doesn't work? Do you see plugin code on frontend, see nothing or something another? Is it possible to provide link to page where we can see the problem?

Regards,
ARI Soft

actually found the answer. i forgot that in the new JCE editor, i have to switch to code view and enter the {arisexy...}, whereas before i could enter it in the visual mode.

where do i put the "vertical-align: middle;" so the text lines up through the middle of the thumbnail?

http://thequijanos.com/index.php?option=com_content&view=article&id=27

how do i line up the words "content..." and the thumbnails. i want the words to move up vertically to the middle of the thumb instead of lining up at the bottom.

You can use the next code:

```
{arisexylightbox thumbWidth="250" thumbCount="2"}content1content2content3{/arisexylightbox}
```

and add the following CSS rule to a site template CSS file:

```
DIV.img-container A
{
  display: inline-block;
  zoom: 1;
  *display: inline;
  vertical-align: middle;
}
```
