
IE9 flickering

Posted by stewstew - 2011/07/23 07:03

i noticed in IE9 during the popup to lightbox, the browser window flickers before the lightbox shows image. Firefox does not flicker and the lightbox pops up smoothly. why is IE9 doing this?

Hello,

Provide link to page where we can see the problem.

Regards,
ARI Soft

Hello

I had this problem before too, but my problem was solved when I updated my Internet Explorer browser. I think it was due to a bug in the Explorer 9. im sorry my english is bad i hope understand me ;)

The problem with javacript code from site template. Open /templates/main2/script.js file, find line #156 and comment or remove the next code:

```
jQuery(window).trigger('resize');
```

It works fine in IE v. 9.0.8112.16421 on our side. We suppose it is a problem with cache on your side.

Regards,
ARI Soft
