
Open Article in lightbox

Posted by moraldi - 2011/07/23 12:52

Hi,
I've created a module of type Custom HTML. Among others I want to have a text link in order of opening an article with a lightbox. Is this possible with the 'ARI Sexy Lightbox'? I tried some code examples from the demo page but it didn't worked

Thanks in advance

Hello,

Yes, it is possible with help of "System - ARI Sexy Lightbox Anywhere" plugin (set "Mode" parameter to "Anywhere") or with help "System - ARI Sexy Lightbox" plugin. For example you can use the next code:

```
{arisexylightbox activeType="article" width="300" height="250" id="97" title="Article"}Show article{/arisexylightbox}
```

Regards,
ARI Soft

with help "System - ARI Sexy Lightbox" plugin
I suppose this is not free. Is it a part of another commercial product?
I ask because I need to display a data table from within an HTML module link using a lightbox.
The 'ARI Data Tables' seems doing my Job but I don't know if I must buy another product.

Do you mean "ARI Sexy Lightbox" or "ARI Sexy Lightbox Lite" extension in your original post? "ARI Sexy Lightbox Lite" is content plugin. Joomla! executes content plugins only in articles, it doesn't execute it in module content. "ARI Sexy Lightbox" can be used in any content, but it is commercial extension.

In my original post I mean "ARI Sexy Lightbox Lite" but it doesn't have sense any more. The actual question is: Can I do my job only with the "ARI Data Tables" or I need the "ARI Sexy Lightbox" also?

"ARI Data Tables" is not lightbox extension and if you want to show something in a lighbox, it requires a lightbox extension. "ARI Sexy Lightbox" or another lightbox extension.

Regards,
ARI Soft
