
HTML appears after gallery -WORKAROUND NOT SOLVED.

Posted by gina - 2011/08/03 17:13

Hello!
I have an odd problem: I'm using the Ari Sexy Lightbox to show a picasa album in an article. The album looks great but after the last photo following code appears: "
Please see the attached picture.

What is more, if I would begin the article with the gallery and keep writing, all the HTML is shown :blink: ... very odd.

I'm using joomla 1.6.5

Please help me!

Best regards,

Gina.

Thank you.
It works, but that's only a workaround. I genuine solution would be to have the problem fixed. Other plugins work without the need to set the text filter parameter to NOT FILTERING.

Probably other plugin(s) use another syntax. This is Joomla! issue.
