
Adding margins

Posted by evilfabio - 2011/08/24 05:28

Hi. I was wondering if it's possible to create a margin so a website within the lightbox isn't hugging the left side.

<http://www.skultar.com/index.php/about>

If you click on the links on the right side, it will bring up the Dark Horse website and the text is smack up against the left side. This is the site it's linking to:

<http://www.darkhorse.com/Blog/456/dark-horse-presents-gets-barbaric>

I'd like to have that margin on the left side in the lightbox, if it's possible.

Thanks,

MJ

Hello,

Try to add the next CSS rule to a site template CSS file:

```
#SLB-Contenido
{
padding-left: 5px !important;
}
```

That did the trick. Thanks so much!

I had the same issue and tried the suggested css modification.

It worked in that I got the padding on the left but then I lost the border on the right of the pop up window.

Any suggestions?

Hello,

Could you provide a link to a page where we can see the problem?

<http://www.mediationcumbria.com/index.php/commercial-mediators>

On the "view profile & Cv" links.

Also, is it possible to link this same module to the image instead of having to use a text link underneath the image?

Thanks

In your case you can remove previous CSS rule and use the next one:

```
#SLB-Image DIV.custom
{
padding: 5px;
}
```
