Stop closing when a user click outside of the box
Posted by kpence73 - 2011/08/28 17:48
_____

On your demo page, the functionality is that the user can only close the lightbox by clicking "close" or the "x". I cannot seem to set this. Anytime I click outside the lightbox, it closes. I cannot have that happen. Is there a setting or code to alter?

I am using Sexy Lightbox Plugin, and both the module and the plugin are enabled. Extensions is installed and enabled, but I do not have SL anywhere installed yet because I do not see the difference between the two modules.

Hello,

If you use "ARI Sexy Lightbox" module, set "Modal mode" parameter to "Yes". If you use "System - ARI Sexy Lightbox", add "modal=1" parameter to link. For example:

Gooooogle

_____

Use "Modal mode" parameter in plugin settings for "System - ARI Sexy Lightbox Anywhere" plugin or modal="1" attribute for {arisexylightbox} tag.
