## Issues with Playing Video in Lightbox

Posted by sandeshsindiri - 2011/08/30 15:25

---

Hi,

Thanks a lot for your prompt support to my previous issues.

My website is [www.truedharma.com](http://www.truedharma.com). There is a video in the home page. Click on the image in the scroller, with title "Welcome to TrueDharma.com!"

Few concerns regarding the video:

1. The video is playing, but the lightbox is so much toward the top and if the lightbox size is increased, the X button disappears.
2. The control bar of the video is not working. I can't mute, I can't do anything.
3. If I have to write something in the lightbox below or above the video, how can I do that. I used "title" but the font and position of it is not impressive.

I used the following code:

Anxiously, waiting for your reply.

Regards,  
Sandesh

Hello,

1. What screen resolution you use?
2. It doesn't work with fancy theme. Choose another theme in plugin/module settings and it will work fine.
3. Do you want to change title font and color or mean something another?

Thank You Very Much..

I think the issues 1 and 2 are resolved.

Regarding issue 3, I need to know, how can I change the font type and font size of the text. And also, If I have to add more text to the lightbox, along with video. How can I do that? Is putting it as title the only way?

If you want to change styles of lightbox titles, add the next CSS rule to a site template CSS file:

```
#SLB-Caption
{
```

---

```
color: red !important;  
font-size: 20px  
}
```

Currently the extension doesn't support multi-line titles. We will add this ability to a future release.
