Sexy Lightbox effecting all img\'s on site

Posted by ezravan - 2011/08/30 18:26

_____

Got the lightbox anywhere working and now IMG's that are not set up with the ARI code or ARI module are being thumbnailed (smaller) and wrapped in the lightbox when you click on them. I only want to use the lightbox in modules and content that I choose, and not on the whole site.
thanks!

_____

Hello,

Disable "System - ARI Sexy Thumbnails" plugin.

Regards,
ARI Soft
