## Thumbnail for youtube vid

Posted by ezravan - 2011/08/30 19:19

---

I'm trying to create a thumbnail that will click and open a youtube in a sexy lightbox.

I tried both of these and no go.

```
{arisexylightbox}{/arisexylightbox}
```

and

```
{arisexylightbox activeType="rcontent" width="800" height="450" url="http://www.youtube.com/embed/6O2ugtqnTbA" title="Video"}{/arisexylightbox}
```

thanks for your help and you could also point me to the support documentation.

Hello,

Use the next code:

```
{arisexylightbox activeType="rcontent" width="800" height="450" url="http://www.youtube.com/watch?v=6O2ugtqnTbA" title="Video"}{/arisexylightbox}
```

---

I used:

```
{arisexylightbox activeType="rcontent" width="800" height="450" url="http://www.youtube.com/watch?v=6O2ugtqnTbA" title="Video"}{/arisexylightbox}
```

The one you suggested. On the front end the actual code

is showing up and not the image. You can see it here: <http://www.novelweek.com/voip-phone-systems-and-servcies>

In the text editor, when pasting the code, I went to HTML view. When I save and go back and look at the HTML view it is exchanging the carrots >< to the rendering code this: < Don't know if that has something to do with it.

If you use a WYSIWYG editor, switch it to plain text mode before inserting plugin code.

I can use tinyMCE editor or JCE I've tried both. Both have the option of the wiswyg or the "source/HTML" code view. I've tried inserting into the source/html view on both and also tried just pasting it in it's normal state. and neither one works.. i end up with the IMG code between the {arisexylightbox} brackets.

```
{arisexylightbox activeType="rcontent" width="800" height="450" url="http://www.youtube.com/watch?v=6O2ugtqnTbA" title="Video"}{/arisexylightbox}
```
