
Can't insert any code in article

Posted by rene - 2011/08/31 15:35

Hello

I just bought ARI Sexy Lightbox und installed it into Joomla 1.7.

I tried to insert the necessary code with the curly braces into an article. Saving the article destroys the Code immediately:

Quotes are masked with HTML-Entities

Do I have to configure the editor (Tiny MCE)?

I'm working on a Mac. I tried it out on Safari and Firefox

```
{arisexylightbox moduleId="<33>"}fhgsfg{/arisexylightbox}"
```

Please help, thank you http://www.ari-soft.com/images/fbfiles/images/Bildschirmfoto_2011_08_31_um_17.png

Hello,

Correct code should look like:

```
{arisexylightbox moduleId="33"}{/arisexylightbox}
```

About formatting problem, use the solution from this post please.

Regards,
ARI Soft

Wow, thank you very much for this fast answer. That's the solution!

Maybe you should give this hint also in the readme.txt

I think other people will have the same problem.

Thank you again
