
Getting horrible scrollbars using youtube

Posted by torstenfix - 2011/09/01 21:23

Hi please help. I've just bought Ari sexy lightbox, installed in on a site. The plugin works, but by some strange reason I get horrible scrollbars vertically and horizontally. I've used the example provided on the demosite but with the same results.

Can any of you help?

Site url: <http://www.fitnessinstruktor.dk/> check link bottom left box "info video"

I've testet this on my Mac, with Chrome, and Safari, and on my Windows box with Chrome

Thanks in advance

Edit: The site is running Joomla 1.6. (might be relevant :))

Hello,

Try to add the next CSS rule to a site template file:

```
#SLB-Image IFRAME
{
  display: block;
}
```

Regards,
ARI Soft
