
Problems using lightbox popup in an Article

Posted by dstamand9 - 2011/09/05 19:09

I have added an image to an article and would like to have it popup in the sexylightbox.

I've added the {arisexylightbox} {/arisexylightbox} in the article.

When I click the image it just loads up the image but not in a popup lightbox.

I then added the sexylightbox moduleid tag:

```
{arisexylightbox moduleid= "61"} {/arisexylightbox}
```

That ends up giving me this:

```
{$data:sexyimage}
```

Does the ari sexylightbox module need to be assigned to this article? What am I missing?

Hello,

Check that "System - ARI Sexy Lightbox Anywhere" plugin is enabled and use the next code:

```
{arisexylightbox activeType="inlineimg" thumbWidth="80"}{/arisexylightbox}
```

I have added the code. Unfortunately it still loads the image as it's own webpage instead of a lightbox :(

The "System - ARI Sexy Lightbox Anywhere" is enabled and set to Mode = Anywhere

Could you provide link to page where we can see the problem and temporary access to your J! backend by email so we could investigate the issue?

Regards,
ARI Soft

Sure!

I've sent you an email with the info.

thank you!
