System - ARI Sexy Lightbox Anywhere (don\'t work) Posted by jvandeweyer - 2011/09/14 11:52

When i past followcing code in my site:

{arisexylightbox activeType="rcontent" width="300" height="250" url="http://www.google.com" link="Show google site" title="Google"}{/arisexylightbox}

Google opens not in a popup, but in the whole page. Any ideas? Thx

Hello,

Could you provide link to a page where we can see the problem? It can be a conflict with a 3rd party extension.

Could you check browser's error console (press Ctrl+Shift+J in FireFox browser) and send page files of the page with the lightbox by email? This process is described here.

Thanks to the broswer error in firefox i think i found the error. I Changed the jQuery version to 1.3.0 instead of 1.4.4 and now it works.

Thanks.

In this case we suppose this problem with a 3rd party extension which requires old version of jQuery.
