
loading external page

Posted by jvandeweyer - 2011/09/21 06:47

On following page:

<http://proweto.be/new/index.php/en/>

the Goooooogle link won't load. Any idea?

Thx

Hello,

Download and upgrade "ARI Sexy Lightbox" module and then clean browser's cache.

Regards,
ARI Soft

Now that I've uninstalled "sexy lightbox lite" and got the Youtube videos playing in a lightbox, the lightbox won't load any external pages anymore. As I mentioned in an earlier post this was once working. Already installed version 1.8.39 but with no solution, the pages keeps loading in the lightbox.

link to site: <http://www.provil.be/index.php/ik-kom-met-de-bus>

code used: {arisexylightbox activeType="rcontent" width="300" height="250" url="http://www.google.com" link="Show google site" title="Google"}{/arisexylightbox}

Thanks in advance for your help.

Greetings

Sorry, but it seems the lightbox works fine on your site. When we click "Show google site" link, Google site is loaded into the lightbox. If it doesn't work for you, try to clean browser's cache.

You are right, after a reboot of my computersystem it now works here too. Strange if you ask my opinion, but it works :) !

Thanks for your support.

Greetings

Help Please.

external page does not load.

Code used:

```
{arisexylightbox activeType="rcontent" width="300" height="250" url="http://www.google.com" link="Show google site" title="Google"}{/arisexylightbox}
```

Already tried:

Update
clear cache browser
test in others computers.

Test Page: (links at the bottom of the article)

http://www.mlcprep.com/prep/index.php?option=com_content&view=article&id=2373&Itemid=109

Some advice ?

Tnks in advance.

It seems you copy-paste plugin code in a WYSIWYG editor. Switch editor to plain text mode and enter code again. WYSIWYG editors usually add extra HTML code in design mode.
