
Make open in lightbox?

Posted by duken666 - 2011/10/01 12:48

Hi,

I have the following issue:

I would like to use lightbox without having to post it on a module position. All I need is some kind of trick to wrap the following command:

-

Hello,

Install, configure and enable "System - ARI Sexy Lightbox" plugin and use the next code:

-

Hello,

When we click by an image from slick gallery on provided, a large image is shown into sexy lightbox. Is it incorrect?

Regards,
ARI Soft

Now is working because I bought the product yesterday and I configured the gallery! now is okay! Thanks for that!
I just have another problem! Im trying to put another callery in the same page, but in a different position and in other category. Im making the same process but when I insert the galery and the light box the page say:

Fatal error: Allowed memory size of 67108864 bytes exhausted (tried to allocate 9792 bytes) in
/home/carojara/public_html/joomla/modules/mod_arisexylightbox/includes/kernel/Image/Asido/class.driver.gd.php on line 448

Im trying to fing the mistake, but I dont know where exactly is because in that line is just a "("

Can you help me??

Try to increase value of "memory_limit" PHP option with help PHP Settings plugin.

Regards,
ARI Soft
