how to remove scroll bar in ari sexy light box
Posted by sttnai - 2011/10/03 05:33

_____

hi, i bought the ari sexy light box.
I have a problem.

I use the light box to insert another joomla module (mod image flow)

when i adjust the size of the pop over box to 100% (width & height), it shows the scroll bar.
and i'd like to remove the scroll bar on the pop over page.

so, is there any solution?
one more thing. how can i remove the border of the pop over box?
i just want to show the close button only at the top right in pop over page and don't want any border.

It's very important for me and would like to get the solution as soon as possible.
would thank to the person who find out the solution.
Thanks

ps
the screen shot shown in below

_____

Download and upgrade "ARI Sexy Lightbox" module and then clean browser's cache. It should resolve the problem with lightbox size when "width" and "height" parameters are set to 100%. About borders, the lightbox doesn't provide ability to remove them.

Regards,

ARI Soft

hello, sorry again

the scroll still appears.
(even if i adjust the vertical scroll bar height as 100%, it still have the scroll bar)
(if i adjust the vertical scroll bar height as 120%, it doesn't show the scroll bar)

the idea of the customer is that he want to completely remove the vertical scroll bar. (currently, the customer want to adjust the height of the pop over page to 70% or 80% of the page)
is there any function to disable the scroll bar?

Here's the screen shot of that
http://s1.postimage.org/je8y9smxn/pop_over_screen_shot3.jpg

Thanks

Sorry, but it seems you haven't upgraded the module. The latest version is 1.8.41, but version 1.8.39 is installed on your site.

now, it got ok,
but the another one is that, when i resize it to 70% for the height, it just shows at the top of the page.

How can i vertically center the pop over?

I mean I'd like to make the pop over page to vertically center of the page.

Thanks again

hi sorry,
i late to reply.

I sent an email to you about that.
Please check your mail inbox.

Thanks

_____

If height is set to 100% or higher, the lightbox is not moved on scroll event. In you case you can remove your style changes, set height to 99% and the lightbox will be moved and centered.
