White Bar on black Style
Posted by adampleiman - 2011/10/03 14:39

_____

I'm getting a white bar on the top of my video window while I am using the black theme. Other than that the plugin works absolutely great. Any idea how I might change that to black. I attempted to change the CSS but i didn't have the correct ID and Class info. You can see the issue here ust click any of the thumbnails

_____

Hello,

Do you use "System - ARI Sexy Lightbox" plugin?

Regards,
ARI Soft

_____

I do. I actually just got it. I needed to add !important behind my background color.

_____

Add "background=#000" parameter to a link. For example use the next link:

http://www.youtube.com/watch?v=Ro7_Z2th4As&rel=0&height=349&width=425&background=#000

instead of:

http://www.youtube.com/watch?v=Ro7_Z2th4As&rel=0&height=349&width=425

Regards,
ARI Soft
