
Thumbnail to open video

Posted by AWCollins5 - 2011/10/04 20:45

I have read previous posts about using a thumbnail as a link for videos and this is the code I am using in my article...

```
{arisexylightbox activeType="rcontent" width="792" height="294" url="http://www.youtube.com/watch?v=30VeXpYG4EU" title="Video"}{/arisexylightbox}
```

When i open the page, no image appears, just the text " as the link.

Example cane be found hereHere

Hello,

It seems this problem with WYSIWYG editor. Switch editor to plain text mode before inserting plugin code because WYSIWYG editors usually add extra HTML code in design mode.

I am just entering it directly into the article. I have tried in the both modes, editor and HTML.

No matter what I do, Joomla changes my code to this..

```
{arisexylightbox activeType="rcontent" width="792" height="294" url="www.youtube.com/watch?v=30VeXpYG4EU" title="Video"}{/arisexylightbox}
```

Could you provide temporary access to your J! backend by email so we could investigate the issue?

Regards,
ARI Soft

I just sent you the email with the info.

Thanks
