
can I use one single thumbnail for ARI lightbox?

Posted by mistan - 2011/10/09 04:29

Can I use one single image (not from gallery) for ARI lightbox module? Looks like it can only use image from gallery folder. ?

Thanks.

Tony

Hello,

Do you want to auto-generate thumbnails for one image and show original image into the lightbox or use one image as thumbnail and show another one into the lightbox?

Regards,
ARI Soft

I want to use an image as thumbnail which is not related to the images in the gallery for lightbox module.
Thanks.

Tony

If you want to auto-create thumbnail for specific image and show original image into the lightbox, you can use "ARI Sexy Thumbnails" plugin or use the next code for "ARI Sexy Lightbox Anywhere" plugin:

```
{arisexylightbox activeType="inlineimg" thumbWidth="150"}
```

```
{/arisexylightbox}
```

Where LINK_TO_IMAGE is a link to necessary image.

How to use ARI Sexy Thumbnails to generate thumbnail for ARI lightbox module? I just want a specific image to be the thumbnail for lightbox module.

Thanks.

"ARI Sexy Thumbnails" generated thumbnails for resized images (for example if an image is resized in a WYSIWYG editor) and show original image in the lightbox.

what can I do in order to use an image (not from the gallery folder) as thumbnail for Sexy Lightbox Module?

Thanks.

Could you explain what do you want to show into the lightbox? Remote page, inline content or something another?

sorry about the confusion. I am trying to setup a lightbox module to display images from a folder. All works well. I choosed single image layout so just one thumbnail from the image folder shows. Is there a way to use a different thumbnail, a separate image which is not from lightbox image folder?

Let me know if I made myself clear.

Thanks.

Set "Layout type" parameter to "Custom text" and use the next code for "Custom text -> Template" parameter:

Where LINK_TO_IMAGE is a link to necessary image.

Where do I set "layout type" per instructions below?

Set "Layout type" parameter to "Custom text" and use the next code for "Custom text -> Template" parameter:

Code:

Where LINK_TO_IMAGE is a link to necessary image

Hello,

In "ARI Sexy Lightbox" module settings or in "System - ARI Sexy Lightbox Anywhere" plugin settings.

Regards,
ARI Soft

I have the module in a position that works just the way I would like. What displays in that position is the "link text" which triggers the lightbox just the way I would like. However, rather than have "link text" show I would rather have a single unrelated image in that module location to click on. Placing img src code in the "text link" doesn't work and I can't locate where to set it to customer. I can't seem to locate "layout type" in either the module or plugins.

Thanks
