## How to use ARI Sexy Lightbox

Posted by sonlinemedia - 2011/10/17 16:13

---

I've installed all the mods that came with the ARI Sexy Lightbox download and have turned it on. I'm trying to add a YouTube video popup on an image and every time I add this code with the rich-text editor off it prints the actual HTML and not the lightbox effect... I've also turned off filtering for the superuser account.

Here is the page I'm trying to get this to work on: <http://joomla.sonlinemedia.com/index.php/video-production>

I've not got the code not showing because I've noticed I had to turn on the plugins. But when I click on the image under "Video Production Services" it loads the YouTube page and does not popup with the lightbox. Here is the code I'm using:

```
{arisexylightbox activeType="rcontent" width="800" height="450" url="http://youtu.be/aT_bY6_bliM" title="Video"}{/arisexylightbox}
```

I did get the video thumbnails to work by using the plugin "System ARI Sexy Lightbox Anywhere" but once turned on my h3 disappear...

Hello,

Could you provide temporary access to your J! backend by email so we could investigate the issue? It can be a conflict with a 3rd party extension or site template.

Regards,  
ARI Soft

Sent the information to your email. Also, I turned the "anywhere" plugin back off so you can see what the blocks on the side usually look like till that plugin is turned on.

Try now please.

PS: We have set "Ordering" parameter to "Order last" in plugin settings that avoid conflict with T3 Framework.
