
Help with Flickr...

Posted by dyoung - 2011/10/24 10:23

Ok, i am stuck...

I have module (mod_arisexylightbox) on the front page which points to my flicker photoset, however set it only shows a single picture.

also clicking on this does not load it up in a lightbox...

I must be missing a setup option someplace..?

Thanks

D

Hello,

Could you provide screenshot(s) of module settings page or temporary access to your J! backend by email so we could investigate the issue?

Regards,
ARI Soft

works fine now...

Can you tell me what i did wrong, so i can avoid doing it again ?!!

Thanks!

D
