Video Gallery - need your advise for tags
Posted by alexmartin - 2011/10/25 22:41

_____

I love your components and plugins. I use Lightbox Anywere.

It does works with flickr image to make a gallery. Yes, I like the idea of the gally you implemented.

Is there any way it also works with flckr videos?
1) What is the plagin tags to show Flicker videos in a similar gallery as image gallery?
2) To create a youtube gallery?

Here is what Iam trying to achieve:

I need to make a video gallery from the front end as a user (it is for users) with the plugin tags. Is there any way it is possible to create something like a video video gallery with this plugin to show videos from Youtube, Vimeo, Photobacket, or any other 3rd party video sites?

Or with any other extentions or components you have?

Looking forward for your advise.
Thankyou very much for fantastic extentions.

_____

Hello,

Sorry, but currently the extension can show video galleries. We will think about implementation this feature in a future release.

Regards,
ARI Soft
