
I can't get the sexylightbox working in Joomla 1.7

Posted by Ginius - 2011/10/27 18:06

I can't get the sexylightbox working in Joomla 1.7. See <http://jansenloopbaanadvies.acceptatie-server.nl/index.php/component/content/article/2-ongecategoriseerd/16-trek-een-kaart>

What am I doing wrong?

All details are already sent to info@ari-soft.com

Hello,

Sorry, but could you explain what doesn't work? When we click by "Trek een kaart" link, the lightbox appears.

Regards,
ARI Soft

The way I build it now (not how it should be) is using the module.

I need to have it in an article. So when you click on the link the lightbox shows up.

I tried your example, but when using the plugin, all plugin-codes are showed, so it seems the plugin is not working.

Could you provide a link to an article where we can see the problem? And could you provide a plugin code which you use?

Regards,
ARI Soft

The link is: <http://jansenloopbaanadvies.acceptatie-server.nl/index.php/testing-module>

The plugin code is: `{ariseylightbox activeType="module" width="300" height="250" id="30" link="Show Joomla! module" title="Joomla! module"}{/ariseylightbox}`

I was to quick.

A click on the link must be opening the random module, that shows a quote/question.

Now when I click on the link I need forst click on 'Trek een Kaart' and that I see the quote. So just one click shows the quote. Just like i did in the right column.

The next code load module with ID equals to "30" into the lightbox. "ARI Sexy Lightbox" module instance has ID equals to "30" so it load into the lightbox:

```
{arisexylightbox activeType="module" width="300" height="250" id="30" link="Show Joomla! module" title="Joomla!  
module"}{/arisexylightbox}
```

If you want to load article with ID equals to 16 into the lightbox, use the next code:

The next code load module with ID equals to "30" into the lightbox. "ARI Sexy Lightbox" module instance has ID equals to "30" so it load into the lightbox:

```
{arisexylightbox activeType="article" width="300" height="250" id="16" title="Joomla! article"}Show  
article{/arisexylightbox}
```

Regards,
ARI Soft

Thanks, thats's working.

Looks much better and wow, what a quick support. Almost as fast as chatten.
