
Add download link below description

Posted by Heather - 2011/10/27 20:50

Hello,

I was wondering if there was a way to add a download link below the description area in the sexy lightbox. I am currently using the plugin to play an flv. I tried adding it inside the parameters of the title, but it didn't work.

Title="My Title Download Here"

Is there another way or is this not possible?

I would appreciate any help

Thanks,
Heather

Hello,

Specify please where "Title" parameter is used? Could you provide full code which you use?

Regards,
ARI Soft

I'm using the system plugin version of Sexy Lightbox within a html module (not the custom one that comes with joomla).

The original code I used to play the video(works great):

Then decided to try and add a download link to the description area and tried this:

Same as before, just tried to add the link within the title parameters and this did not work. The link just ended up next to the image - used to open up the video
