## Support of real Flickr galleries

Posted by lvr123 - 2011/11/10 23:24

---

Hi,

I read in the features

Can embed Flickr photos based on Flickr photoset ID(s), user ID(s), collection ID(s) or group ID(s) into Joomla! content and display it in attractive lightbox.

I don't read explicit support of Flickr galleries.

Can someone confirm me wether this is supported or not ? Thanks.

Hello,

The extension doesn't support Flickr galleries, but it can load sets, collections, groups and recent photos.

If you offer it to me I will add you this support B) I already did it in another extension for flickr support.
