
ARI sexylightbox in conflict with FJ-related com

Posted by geertf - 2011/11/13 14:51

Hi there,

I'm very pleased with the working of ARI Lightbox. But there's one problem.

I'm getting a warning (in the content) when I also install FJ related component. Thsi is the warnin:

Warning: Parameter 1 to AriLightboxAnywherePluginBase::onPrepareContent() expected to be a reference, value given in C:\Program Files\xampp\htdocs\joomla\libraries\joomla\event\event.php on line 48

Can you help me to solve this problem?

Hello,

We can investigate described problem if you provide a link to a page where we can see it and temporary access to your J! backend by email. It seems this problem with a 3rd party extension which triggers "onPrepareContent" event with incorrect parameters.

Regards,
ARI Soft
