
Problem School server - can I change the word sexy

Posted by yorkshirelad - 2011/11/15 17:23

Hi Guys -

Great product but after installing it and getting it working we've just discovered that the word sexy in the name of the script and style-sheet etc is causing a problem with the school servers - is there anyway that this can be changed? I'm comfortable amending code if I know where to look but any help would be really appreciated.

Many thanks

Hello,

I have a similar problem. The IT department have a filter for words in the firewall and we can not have the word sexy on it either. I have purchased the extension and I would like to know if its possible to change this?.

Thanks!

Hello,

Sorry, but it is not possible. We offer other lightbox extensions like "ARI Colorbox", "ARI Pretty Photo" and "ARI Fancybox". You can be interested in one of them.

Regards,
ARI Soft
